# Analytical Paragraph Class 10 Solved Examples

Here we are providing some Analytical Paragraph Examples as per the latest English Class 10 CBSE Syllabus.

#### **1.Analytical Paragraph**

The given pie chart shows the amount spent by a family on different items in a month. Write an analytical paragraph using the information in the chart.

The pie chart shows the distribution of monthly expenses of a family in different categories. Notably, the largest expenditure of the household is allocated to groceries, accounting for 23% of their total expenditure. Looking closely, education is the second highest priority with 20% allocation.

Clothing and transportation are the next two important expenditure categories, each comprising 19% and 18% of the budget, respectively. Around 15% of the expenditure is spent on miscellaneous items like stationery, cosmetics, and accessories. The smallest portion of their budget is dedicated to rent, making it their lowest spending category.

It is clear that a substantial amount is directed toward essential categories, namely groceries, education, transportation, and clothing. It emphasizes the prioritization of necessities over discretionary spending by the household. Even after considering the primary focus on groceries, a remarkable portion is still allocated to education, highlighting its importance.

Interestingly, households show prudence in spending, as evidenced by their limited allocation to miscellaneous items and non-essential expenses. This pattern becomes even more apparent when comparing their expenditure on liabilities, such as rent and miscellaneous items. About 85% of his budget is committed to addressing financial responsibilities including rent, while only 15% is set aside for discretionary spending.

Finally, the household's expenditure distribution underlines their responsible financial management, with significant emphasis on essential needs and limited spending on non-essential items.

### 2. Analytical Paragraph

The given graph shows the birth and death rates in a country from 1901 to 2101. write an Analytical Paragraph in about 150 words:

The line graph provided shows the change in birth and death rates from 1901 to the present, as well as estimates up to 2101.

In the period from 1901 to the present day, the birth rate has consistently been higher than the death rate. Starting at 20,000 at the beginning of this time frame, it reached a peak of 66,000. Thereafter, the rate showed up and downs, between 65,000 and 50,000. Estimates project a gradual decline to about 45,000 births. On the other hand, the death rate dropped below 10,000 and showed a steady increase until the present day. This growth is projected to accelerate significantly between 2021 and 2051, potentially stabilize around 60,000, and subsequently experience a slight decrease until 2101.

# 3. Analytical Paragraph

The given bar graph shows the increasing use of skin care products by men and women over a period of three months. Write an analytical paragraph on the given information.

Products used by men				Products used by women	
35-		her L		Facewash S Toner Sunscreen	
of times	82	Π		- 00 - 10 - 10 - 10 - 10 - 10 - 10 - 10	
25 -				<sup>5</sup> <sup>25−</sup> □ □ □ □ □	
₹ 20-				₽Z 20-	
10-	June	July	August	June July August	

The bar graph provided shows the use of skin care products by both men and women over a period of three months. The products in focus are facewash, toner, and sunscreen.

For men, the major product used is face wash. In June, facewash was used about 33 times, followed by 30 times in July and a maximum of 35 times in August. Toner use among men started 27 times in June, decreased to 20 times in July, and then increased to about 33 times in August. Sunscreen usage by men jumped 29 times in June, 25 times in July, and 32 times in August.

In contrast, among women, sunscreen emerges as the most commonly used product. Facewash was used 25 times in June, 22 times in July, and 24 times in August. Toner use among women started 22 times in June, increased to 25 times in July, and increased to 27 times in August. Specifically, sunscreen, being the primary choice, was applied 34 times in June, followed by 29 times in July, and 35 times in August.

In conclusion, the data indicates that there was a significant increase in the use of facewash by men, which reached its peak in August. Similarly, an increase was observed in the use of sunscreen by women, which reached its peak of 35 applications in the month of August.

# 4. Analytical Paragraph

The graph shows the recent technological revolution in India in recent years. Write an analytical paragraph on the given information by selecting and reporting key features.

The given line graph clearly represents the rapid boom of the technological revolution in India from 2005 to 2020 – a span of fifteen years that saw remarkable changes. During this period, the adoption of communications technology became extraordinarily widespread, changing the digital landscape.

The growth in Internet and smartphone use began in 2005, with a particularly notable increase. Starting from only 30 percent in 2005, Internet use achieved an astonishing 100 percent growth, reaching 60 percent by 2010. The momentum continued, rising to 75 percent in 2015 and reaching an impressive 90 percent in 2020, indicating that 9 in ten Indians were active internet users.

Similarly, smartphones experienced rapid growth. By 2010 it had risen to 15 percent and then to an astonishing 65 percent. it has shown steady growth since 2015, gradually increasing to 69 percent by 2020.

The introduction of tablets was delayed in this communication revolution, but remarkable progress was seen within a short span of five years from 2015 to 2020. Despite modest beginnings in 2015, tablet usage grew to an impressive 48 percent by 2020, indicating that one in two Indians adopted the technology.

The communication revolution in India unfolded with unprecedented speed and suddenness, redefining the way individuals connect and connect. The trajectory suggests that if this momentum is sustained, eventually the entire Indian population may become active participants in this revolution.
